

from Tampico, than any formal interference with the freedom of navigation at Tampico.

WORD IS NOT EXPECTED

UNTIL FIRST PART OF WEEK
Nagasaki, Japan, June 6.—(Continued from page 1.)—The word about the Constitutional attitude toward mediation is not expected by the South American envoys until Monday or possibly Tuesday. They believe that General Carranza's trip from Durango to Saltillo will occupy him during the next forty-eight hours, and they are not disposed to worry about the delay, believing time for deliberation is essential at this moment.

Neither the mediators nor any of the Mexican or American delegates here have any inkling of what the Constitutionalists will do. The feeling, however, is one of hope. Such informal word as has been conveyed here from Washington indicates that the situation is highly encouraging, though it is believed the formal answer from Carranza will not be drafted until he gets further information from his agents in the United States.

The question of ammunition shipments to either the Constitutionalists or the Huerta government is not giving the mediators concern, as they hold to be an issue purely for the American government to decide. The only armistice in effect now is between the Huerta government and the United States, and so far as known there has been no agreement with the Washington government with the mediators, or other of the Mexican factions as to the shipment of arms from the United States to Mexico, the whole question being one of policy.

HUERTA ORDERS PORT OF TAMPICO BLOCKADED

Mexican Foreign Office Sends Note to Legations Notifying Them of Intention.

Mexico City, June 6.—The Foreign Office sent a note to the legations this afternoon notifying them that the port of Tampico had been blockaded by order of President Huerta. The United States government was also notified, through the Spanish ambassador at Washington.

RICHMOND'S MILK SUPPLY BEST IN WORLD, SAYS LEVY

Chief Health Officer Explains New Regulations as to Tuberculosis Test.

APPROVED ADDED PRECAUTION

Forty Herds Have Been Tested—After September, 1915, No Untested Cows Will Be Allowed.

That Richmond has the best milk supply of any large city in the United States, notwithstanding the fact that the new regulation requiring all cows to be tested for traces of tuberculosis has not yet gone into effect, was the emphatic statement of Chief Health Officer E. C. Levy yesterday. In a clear account of the efforts being made to protect and improve the milk supply of Richmond, Dr. Levy said:

"Three or four weeks ago T. J. Stench, dairy inspector for the Richmond Health Department, informed me that a local abattoir had slaughtered a herd of cows purchased from a farmer in Chesterfield County, and had found them seriously affected with tuberculosis. He stated further that the man who sold these cows to the abattoir was a dairyman whose milk was sold in Richmond. Without a moment's hesitation I instructed my branch to see that this man's milk was shut out of Richmond until he had his entire herd tested with tuberculosis."

"When the Richmond Health Department was reorganized, in July, 1908, the Board of Health and I, the Chief Health Officer, had before us the tremendous task of building up a complete department along modern lines."

"One of the very first things which we went at was our milk supply. On May 1, 1907, that is, ten months after the reorganization of the Health Department, we started in on this line of work. On that date inspection of dairies supplying milk to Richmond was begun. As was to be expected, we found that, with one or two exceptions, the dairy farms sending milk to Richmond were of the kind found everywhere at the start, that is, they were utterly unfit to produce milk safe for human consumption."

"The average score of all dairy farms sending milk to Richmond was 28.9 per cent of perfect on the government score card. In May and June, 1907, over three-fourths of all our dairy farms (75.2 per cent) actually scored under 50, and only one per cent of these places scored between 70 and 80. We rapidly brought about improvements. At the start 57 per cent of all our dairy farms scored under 40, but in four months all these places had been so improved that not a single one of them scored under 40."

"This work has progressed steadily since then. At the present time we have no dairy farm scoring under 70, and only 17 per cent score between 70 and 80. In other words, only 17 per cent of our dairy farms are now as low as their score as the best of them were at the start, and only 2.3 per cent of our dairy farms were able to get as high as this at the start."

RICHMOND MILKS HAS NATIONAL REPUTATION

"As a result of this incessant work, the milk supply of this city of Richmond has a national reputation as being the best of any large city in the United States, and, best of all, this reputation is based on the expert opinion of such outside parties who have visited Richmond in the last few years (some of them for the express purpose of looking into this matter) have seen and heard, and have made the statement that Richmond has the best milk supply of any city in the world."

"Not one of the experts has given this opinion on our milk, but they have come around among our dairy farms and seen for themselves. No one has been able to get as far as to know we have not yet met compulsory tuberculosis testing."

"As a matter of fact, a considerable part of the total milk supply of Richmond is, even at the present time, obtained from herds which have been tested for every year or two dairy cattle in Richmond unless they have a herd which has been tested with tuberculosis and from which every reactor has been removed."

"After September, 1915, every cow from which milk is sent to Richmond must be tuberculosis tested. Even now we know of forty herds which have been tested during the past three years."

TESTS ARE MADE IN FORTY HERDS

"So far as Richmond is concerned, out of forty herds, containing 1,324 cows, which we know have been tested in the past three years, only two herds have been found with as high as 50 per cent reactors. Out of forty herds, (1,324 cows) only four had as many as 20 per cent reactors. The other thirty-six herds (3,160 cows) had only three reactors, or 6 per cent. One of these thirty-six herds had five reactors out of twenty-six cows; another three reactors out of forty cows; three others had two reactors each out of herds of twenty-four, twenty-five and twenty cows, respectively; five herds had one reactor each,

Real values for your "hard earned" cash.

An assortment of shirts has been collected, culled, condensed and pruned so that only the best of each class is here—Manhattans and the Berry Shirt.

If you want the best silk shirt or the best cheap shirt it's here. Prices from \$1 to \$6.

Now's the time to stock up for that vacation when your coat is secondary to your shirt.

Belts—initialed, 50c and up.

Neckwear from everywhere to wear anywhere.

VACATION LUGGAGE

How much does "Berry" luggage cost?

Any sum from a couple of dollars up. And it's worth twice what you pay, because there's NOTHING LIKE IT—in its style, leathers, or inlaid strength.

We've a splendid lot from which to select.

C. J. Perry & Co.
ESTABLISHED 1879

while, finally, twenty-six herds, containing in the aggregate 836 cows, had not a single reactor.

"It is well known to-day that the bacillus which causes tuberculosis in man is a different organism from the bacillus which causes that disease in cows. The former is commonly spoken of as human bacillus, the latter as the bovine bacillus. Now it is further known that the bovine bacillus is so seldom found in human tuberculosis of the lungs (that is, consumption) as to be almost negligible. The bovine bacillus is, however, found in a small percentage of cases of abdominal tuberculosis, bone and meningeal tuberculosis in children. Taken altogether, the bovine bacillus causes a very small percentage of all cases of human tuberculosis. I do not for a moment say that even this small percentage of risk should not be done away with as rapidly as possible, but it is relatively unimportant in comparison with tuberculosis of entirely human origin and in comparison with the other dangers connected with an uncontrolled milk supply."

"The latter respects the Richmond milk supply is better safeguarded than is the milk supply of any large city in the United States—the best of any large city in the world—is what the National Commission on Milk Standards says."

visit to Russia on a tour of inspection of the hospitals.

He has been accorded a very friendly reception by prominent surgeons here, and had a great time on the occasion of his visit to the clinical hospital of Professor Fedoroff, where all the students and doctors turned out to give him a fitting welcome.

Dr. May has just left for Moscow for a few days, and will proceed later to Kiev and Odessa.

Earl of Castle Stuart Dies.

London, June 6.—The fifth Earl of Castle Stuart, male representative of the royal Stuart family, died to-day, aged seventy-seven years. He left no sons, and is succeeded in the title by Andrew John Stuart, a cousin.

VIRGINIA SUMMER RESORTS and MOUNTAIN HOMES on the line of the NORFOLK AND WESTERN RAILWAY.

SUMMER EXCURSION TICKETS at greatly reduced rates on sale until September 30, final limit October 31, 1914. With stop-over privileges at all stations. Good News For Sufferers From Kidney Diseases

The kidneys, from their delicate construction and the filtering work required of them, are more susceptible to disease than any other organ in the wonderful machinery of the human body. The most deplorable feature of kidney disease consists in its subtle and elusive character, and so insidious are its ravages that many victims do not even suspect its existence until the advanced stages have been reached.

Few people, after reaching the period of maturity, are in possession of absolutely healthy kidneys; it follows that the greatest care and vigilance must be exercised to keep these organs free from the dangers that constantly beset them.

Since the discovery of Warner's Safe Kidney and Liver Remedy about 27 years ago, many sufferers from kidney diseases have been benefited by its healing properties. Many physicians consider it an excellent remedy in the treatment of diseases of the kidneys, liver and blood. Get it to-day. It is sold by all druggists in 50c and \$1.00 sizes.

Other Warner's Safe Remedies are: Safe Rheumatic Remedy; Safe Diabetes Remedy; Safe Nervine; Safe Asthma Remedy; Safe Pills. No Warner preparation is recommended as a "Cure-all," but each is for a purpose. Send for sample and booklet to Warner's Safe Remedies Co., Dept. 285, Rochester, N. Y.—Advertisement.

SUIT TO RECOVER MISUSED MILLIONS

(Continued From First Page.)

has been considering for some time a minority stockholders' bill in equity. The actual filing of the suit, it became known, was delayed through a necessary wait to give the present directors a chance to take action against certain directors at the time of the meeting of the New Haven system. This wait must be for a "reasonable time." If the present directors have not proceeded, the stockholders categorically meet the courts.

The stockholders were at first anxious to have Attorney-General McKee take up the matter. At so far, it was declared, the Department of Justice has done nothing.

Another reason for delaying the actual filing of the suit was to await a final solution of the Boston and Maine question. It was thought that if by any chance the Boston and Maine did go into the hands of receivers, this would solve the problem, as the receivers could file suits to compel a restoration of the lost millions by the Morgan estate and directors of the New Haven.

MAY PROVE FATAL FOR ROCKEFELLER TO APPEAR

Washington, June 6.—John A. Rockefeller, attorney for William A. Rockefeller, today presented to the Interstate Commerce Commission a statement that, according to Mr. Rockefeller's physician, it would be dangerous for Mr. Rockefeller to come to Washington and testify in the commission's investigation of New Haven affairs. Mr. Carver told of a serious condition of Mr. Rockefeller's throat, and said the physician feared the giving of testimony would aggravate the affection to an extent that might be fatal. It was impossible for Mr. Rockefeller to write, the attorney said, as he was afflicted with palsy.

Chief Counsel Joseph W. Folk asked if Mr. Rockefeller had not recently attended meetings of the New Haven board. Mr. Carver replied Mr. Rockefeller's attendance at such meetings was largely formal, that it was something he was in the habit of doing and involved no nervous strain.

David E. Brown, an accountant of the commission, testified to-day that an examination of the records of the New England Navigation Company did not show the purchase of the Worcester, Nashua and Rochester Railway by the New Haven Company, although the books of J. P. Morgan & Co. disclosed the fact that such a sale was made through the Morgan house. Brown also stated that the records of the New England Navigation Company did not show the sale of 23,520 shares of railroad stock to the New Haven.

Mr. Brown said he had found several items of assets on the books of the New Haven that he considered questionable. One of these, he said, was the investment in the navigation company, which, he said, was written up \$2,250,000.

"That ought to come out," said Mr. Brown. "The company has a further asset on the books represents the discount on the bonds of the Westchester road. That ought to come out, and with these deductions the profit and loss surplus of the New Haven, instead of approximately \$12,000,000, as Mr. Tomlinson's figures showed."

PURE BLOOD MAKES HEALTHY PEOPLE

Hood's Sarsaparilla surely and effectively removes scrofula, boils and other blood diseases because it drives out of the blood all the humors that cause these diseases. They cannot be successfully treated in any other way. External applications for their removal have proven almost useless, because they cannot drive out the impurities that are in the blood.

Hood's Sarsaparilla makes pure, rich blood, perfects the digestion, and builds up the whole system. The skin becomes smooth, clean and healthy. This great blood remedy has stood the test of forty years. Insist on having Hood's, for nothing else acts like it. There is no real substitute. Get it to-day. Sold by all druggists—Advertisement.
